

Christoph Haemmig, Expert in Natural Hazards (geological hazards, GLOF, process chains, risk analysis, mitigation measures)

Mr. Christoph Haemmig holds a master's degree in Earth Sciences from the University of Bern, Switzerland. Mr. Haemmig is currently deputy head of the Engineering Geology and Natural Hazards Division at GEOTEST Ltd. and is a member of several professional associations (e.g. inggeol.ch, FAN, CHGEOL).

Christoph Haemmig has 17 years of professional experience. He executed numerous relevant projects in the field of natural hazards, disaster risk reduction and applied engineering geology. He holds the position as Senior Project Manager both in Switzerland as well as in international projects, including in remote mountainous areas in the Himalayas (e.g. India, China). He has considerable experience in hazard assessment (i.e. GLOF, landslides, rockfall and process chains), risk analysis, planning of mitigation measures (i.e. Early Warning Systems, structural measures and hazard maps) and in capacity building (training, workshops, know-how transfer) with various stakeholders.
